Personal Profile:

I started my journey in this field as a mother of special needs child. My daughter has pure medical condition so could not use much of what I learnt to help her.Started with helping other children in need and Centre was established. So that the children benefit ,did more courses to support my learning. After doing the Play therapy realized the scope to teach children is much more vast in a fun way while keeping their preferences in mind.Will be integrating play therapy to help the children learn communicate and emote more effectively.
